JP Goldman — Go-Live Conditions Checklist

Dan's conditions from his email, set against the latest re-check of the staging site (full results follow). Staging: https://www.staging3.jpgoldman.co.uk/ · First check 13 October 2026, updated after re-check.

GREEN LIGHT Dan's green light needs items 2, 3 and 4. Item 2 is ready; item 3 needs one launch-day step; item 4 is resolved apart from one post (see 4).
CHANGES MADE None by this check — read-only. Changes on staging were made by the build team.

#	Dan's request	Status	Where it stands now and what's needed
Before go-live — needed for the green light			
1	**Quote calculator.** Perfect Portal calculator on /our-fees/. Test straight after switchover; roll back if it doesn't load.	BLOCKED ON STAGING (EXPECTED)	The calculator still doesn't start on staging: Perfect Portal returns empty (0-byte) calculator files to the staging address. The calculator scripts are unchanged. A **backup box now appears after about 8 seconds**: "Get your fixed-fee quote – call 0161 850 5600 or email enquiries@jpgoldman.co.uk", with a call button (see screenshots). **Before launch:** ask Perfect Portal to confirm the calculator will work on the live domain. **Launch day:** run a full test quote and click the floating "Instant Estimate" button straight away; roll back if either fails.
2	**Blog page.** Confirm /blog/ shows all posts correctly and send a screenshot.	READY	Staging /blog/ shows 50 post cards, no raw code, and every category filter works (Buying 20, Selling 5, Remortgaging 3, Law changes 18, News 4). See screenshots. Note: 6 cards now link to service pages rather than their own articles (see 4). **After switchover:** send Dan a screenshot of /blog/.
3	**Redirects and robots.txt.** All four homepage versions redirect to https://www.jpgoldman.co.uk; robots.txt fixed; launch-day steps followed.	ONE LAUNCH STEP	Per the re-check, all four homepage versions end up at https://www.jpgoldman.co.uk. The two plain http:// versions take two hops (via https without "www") — works and loses no traffic, but a single direct redirect would be cleaner. Staging still blocks search engines (robots.txt `Disallow: /` and noindex) — correct for now. **Launch day:** untick "Discourage search engines" in WordPress, then recheck robots.txt and the homepage robots tag.
4	**New pages.** Hold all 17 staging-only pages back as drafts; launch with existing pages only.	RESOLVED · 1 POST TO FIX	Confirmed: 15 pages now return 404 (drafts). /quote/ and /fees/ still load but nothing links to them — all "Get a quote" and "Our fees" links now go to /our-fees/ (spot-checked on homepage, /blog/, /contact/, /conveyancing/, /our-fees/). **Launch day:** set /quote/ and /fees/ to draft. **To fix:** "Why First-Time Sellers Need Conveyancing Just as Much as Buyers" is an **existing post**, not a new page — staging only changed its address. It was drafted with the others, so its original address now leads to a 404. Republish it. Also, the 5 drafted posts still appear as cards on /blog/, now linking to service pages (e.g. "Stamp duty on second properties" → /stamp-duty-explained/); decide whether to hide those cards.
Within a couple of weeks of launch			
5	**Perfect Portal.** The five main forms, including contact, still send by email only. What to ask the BDM?	WAITING ON PERFECT PORTAL	Unchanged: the main forms (contact and quote) send by email through Contact Form 7. The six wills, probate and power of attorney pages use Perfect Portal intake forms, which load correctly. **Questions for the Perfect Portal contact:** (a) Can the calculator be switched on for the new site? (b) Can the contact and quote forms send leads straight into Perfect Portal instead of by email? (c) Should conveyancing enquiries use the same kind of intake form as the probate pages?
6	**Mobile speed.** Score 65, main content 5.3 s. Will it improve over time?	STILL OPEN	Not re-tested. Last mobile score 56–65, main content (LCP) about 5.3–5.4 s. It won't improve on its own. Fixes after launch: trim the unused design code that loads on every page, and shrink or prioritise the homepage's main image.
Dan's side / for us to answer			
—	Analytics and Search Console access; test enquiries reaching their inbox.	ANSWER DAN	Dan asks **which email address** the test enquiries were sent from — reply with it. Tracking tags G-1XDXG7F64J and GT-5R4WK5PZ are each installed once on staging.
—	Written confirmation that JP Goldman owns the website, content, domain and all analytics accounts, and that enquiries come only to them.	ANSWER DAN	Needs a written reply from Legalbuzz — not something the site check can confirm.
Content after launch — noted, no action before go-live			
—	**Digital Conveyancing Maturity Index:** "Platinum status in the 2026 Digital Conveyancing Maturity Index, a Digital Maturity Score of 79.3%, and a place in the top 10% of this year's respondents"; add the official badge. · **Charity & community:** Urmston Meadowside UBs details and photos to follow. · **Meet the team:** names, roles and photos to follow. · **Monthly blogs:** continue, each sent to JP Goldman in draft for a compliance read.

JP Goldman — Staging Re-Check Results

Staging: https://www.staging3.jpgoldman.co.uk/ · Read-only check in headless Chrome (desktop 1366px), plus page-source checks. Requests spaced out to avoid SiteGround's bot protection.

What's still open

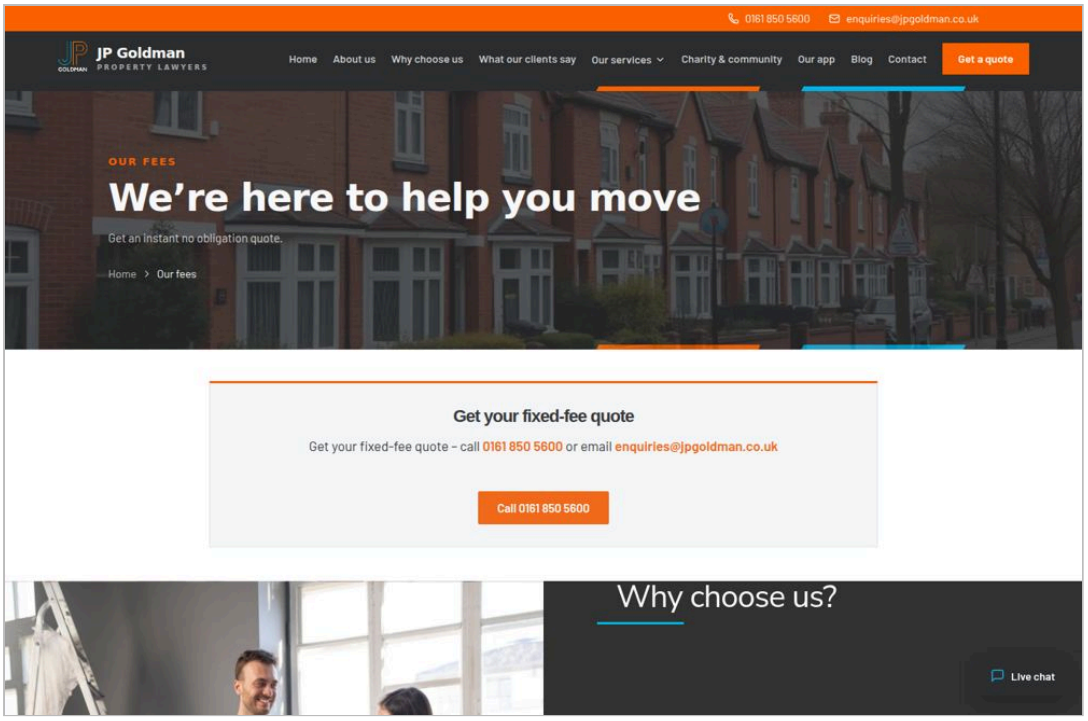

1. **Republish the existing post "Why First-Time Sellers Need Conveyancing Just as Much as Buyers".** It was drafted with the new pages, so its original address now leads to a 404.
2. **Decide on the 5 drafted posts' cards on /blog/.** They still show, now linking to service pages instead of their articles.
3. **Launch day:** set /quote/ and /fees/ to draft; untick "Discourage search engines" and recheck robots.txt; run a full test quote and click "Instant Estimate" straight away (roll back if either fails); screenshot /blog/ for Dan.
4. **Before launch:** Perfect Portal to confirm the calculator will work on the live domain.
5. **Open after launch:** Perfect Portal lead routing (item 5) and mobile speed (item 6).
6. **Optional:** a single direct redirect for the http:// homepage versions instead of two hops.

Results

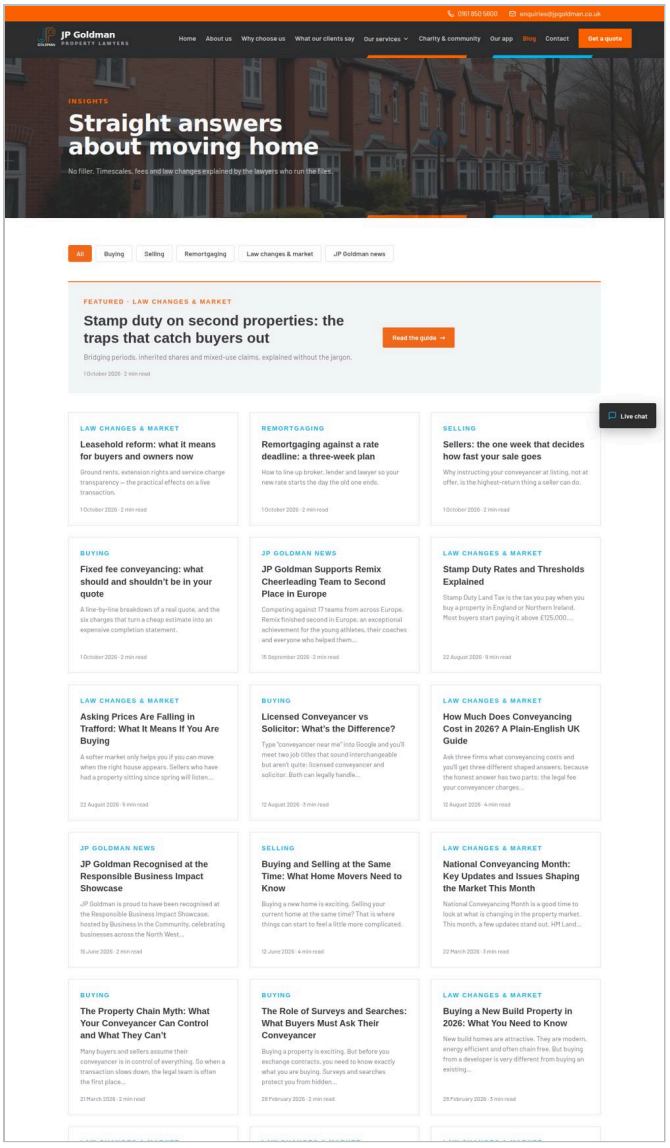

Check	Result	Evidence / notes
1a. Calculator on /our-fees/	**BLOCKED (EXPECTED)**	Perfect Portal returns both calculator scripts empty (200, 0 bytes) to staging, so the calculator can't start. Scripts on the page are unchanged.
1b. Backup quote box	**PASS**	Appears after about 8 seconds: "Get your fixed-fee quote – call 0161 850 5600 or email enquiries@jpgoldman.co.uk", with a "Call 0161 850 5600" button.
1c. /our-fees/ design	**PASS**	Now uses the new header and hero ("Our fees · We're here to help you move").
2a. /blog/ listing	**PASS**	50 post cards, no raw shortcode text on the page.
2b. Category filters	**PASS**	Buying 20 · Selling 5 · Remortgaging 3 · Law changes & market 18 · JP Goldman news 4 · All 50.
2c. Cards for drafted posts	**CHECK**	Cards still show for the 5 drafted posts and the first-time sellers post, now linking to service pages: Stamp duty on second properties → /stamp-duty-explained/ · Leasehold reform → /leasehold-and-shared-ownership-conveyancing/ · Remortgaging against a rate deadline → /remortgage-conveyancing/ · Sellers: the one week… → /selling-a-house-conveyancing/ · Fixed fee conveyancing → /fixed-fee-conveyancing/ · Why First-Time Sellers… → /selling-a-house-conveyancing/. All targets load (200).
3a. Homepage redirects	**PASS (per re-check)**	All four versions end up at https://www.jpgoldman.co.uk; the http:// versions take two hops via https without "www". (The http:// versions can't be tested from this check's environment.)
3b. Search-engine block	**CORRECT FOR STAGING**	robots.txt `User-agent: *` / `Disallow: /` and `noindex, nofollow` on the homepage. Must be switched off at launch.

4a. 15 new pages drafted	**PASS**	All return 404: /approach/, /areas-bolton/, /areas-manchester-city-centre/, /commercial-conveyancing/, /fixed-fee-conveyancing-explained/, /leasehold-reform-what-it-means/, /power-of-attorney/, /remortgage-timeline-rate-deadline/, /sell-faster-contract-pack/, /services/, /services-buy-to-let-and-portfolios/, /services-buying-and-selling/, /stamp-duty-for-second-properties/, /wills-and-testaments/, /why-first-time-sellers-need-conveyancing-just-as-much-as-buyers/.
4b. /quote/ and /fees/	**PASS**	Both still load (200) but nothing links to them: 0 links to /quote/ or /fees/ on the homepage, /blog/, /contact/, /conveyancing/ and /our-fees/; every "Get a quote" / "Our fees" link goes to /our-fees/. Set both to draft on launch day.
4c. Existing first-time sellers post	**FIX**	Its original address (/why-first-time-sellers-…/ with a non-breaking hyphen) 301-redirects to ?p=819, which returns 404 because the post is now a draft. It existed before this project, so it should stay published.
5. Forms	**UNCHANGED**	Contact and quote forms send by email (Contact Form 7). Perfect Portal intake forms load on Will Writing, Wills & Probate, Grant of Probate, How Long Does Probate Take, Lasting Power of Attorney and Probate Property Sale.
6. Mobile speed	**NOT RE-TESTED**	Last Lighthouse mobile result: Performance 56, LCP 5.4 s, CLS 0.062 (Dan's figure: 65 / 5.3 s). Slow element is the homepage hero image; render-blocking and unused CSS add about 2 s.
Tracking tags	**PASS**	G-1XDXG7F64J and GT-5R4WK5PZ each installed once.

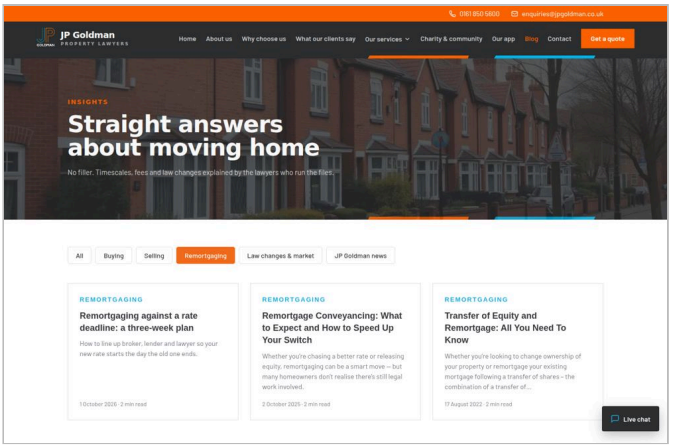

Screenshots (staging, re-check)

/our-fees/ — new design; backup quote box shown because the Perfect Portal calculator is blocked on staging.

/blog/ — 50 post cards with category filters (top of page).

/blog/ — "Remortgaging" filter applied (3 posts).
